Meter Replacement Program

The Town of Daysland is beginning a Water meter replacement program; and also a Water and Natural Gas meter reading improvement program. This project will be starting in 2024 and will continue into 2025, which is the expected year of completion.

Water meters measure and record the amount of water used in your home or business and can detect water leaks. We will be replacing all water meters as they are reaching the end of their life cycle. This helps in the effort to ensure the Water meter is operating efficiently and accurately.

Natural Gas meters measure and record the amount of Natural Gas used in your home or business. These Gas meters will be getting a new meter reading device installed, as the current reading devices are reaching the end of their life cycle. This helps in the effort to ensure that the Natural Gas meter readings are accurate.

The Town has partnered with Metercor to complete all replacements.

Metercor and /or the Town will be contacting all residents and business owners in the Town by letter and/or phone to set up appointments for this replacement project. If your contact information has changed please contact the Town office to update the utility records.

Scheduled to start in early October 2024!

Please don't blow grass clippings etc. on the roadways.
May cause drainage issues.

Property residents are also reminded to cut boulevards.
