Protect Daysland's Trees: Managing Black Knot This Season

Dear Residents,

Have you noticed hard, black, tar-like swellings on your cherry or plum tree branches? This is **Black Knot**, a fungal disease that is highly aggressive in our region. If left untreated, it can stunt growth and eventually kill your trees.

How to Take Action:

- **The Best Time:** Prune between **late fall and early spring** (before buds break) when the fungus is dormant.
 - **The Right Cut:** Remove infected branches **15–20 cm (6–8 inches)** below the knot. Pruning to a healthy branch collar is better than leaving a stub.
- Sanitize Often:** Dip your tools in a **10% bleach solution** or 70% rubbing alcohol between every single cut to ensure you aren't spreading spores to healthy wood.

Proper Disposal in Daysland:

It is critical that diseased wood is **not composted**. Spores can remain active for up to four months after a branch is cut.

- **Weekly Garbage Collection:** Small, infected branches should be **double-bagged** and placed in your regular household garbage. Garbage pickup in Daysland is every **Wednesday**.
- **Daysland Transfer Site:** For larger quantities, residents can use the Daysland Transfer Station located at **56 Ave**.
 - **Hours:** Tuesdays (8:30 AM – 4:30 PM) and Saturdays (1:00 PM – 4:30 PM).
 - **Note:** There is typically a **\$5 fee per visit** for the transfer site.

Let's work together to keep Daysland's canopy healthy!

Please don't blow grass clippings etc. on the roadways. May cause drainage issues.
